

# We're planning improvements at Forton Wastewater Treatment Works and the local sewer network

We look after miles and miles of sewer pipes, in fact around 48,000 miles! And when you have a shower, wash the dishes or flush the toilet our sewers take the used water to one of over 560 sites we operate across the North West – so it can be safely returned to the environment.

We're currently designing a project which we're planning to start in autumn 2022 that involves making improvements at Forton Wastewater Treatment Works and the local sewer network. When the project is completed, we can then treat the used water to a much higher standard which will help to improve the quality of water in the River Cocker and meet the demands of the growing community.

## Our planned improvements

We're planning to install a new sewer pipe from School Lane, close to the junction of Coronation Avenue which will run through to the treatment works near Hollins Lane. We'll also carry out upgrades and improvements at the treatment works and build a new wastewater pumping station. We have an area of work to complete to install a new pipe within the Kingswood Development area, If this work impacts on you or your property our team will be in touch closer to the time.

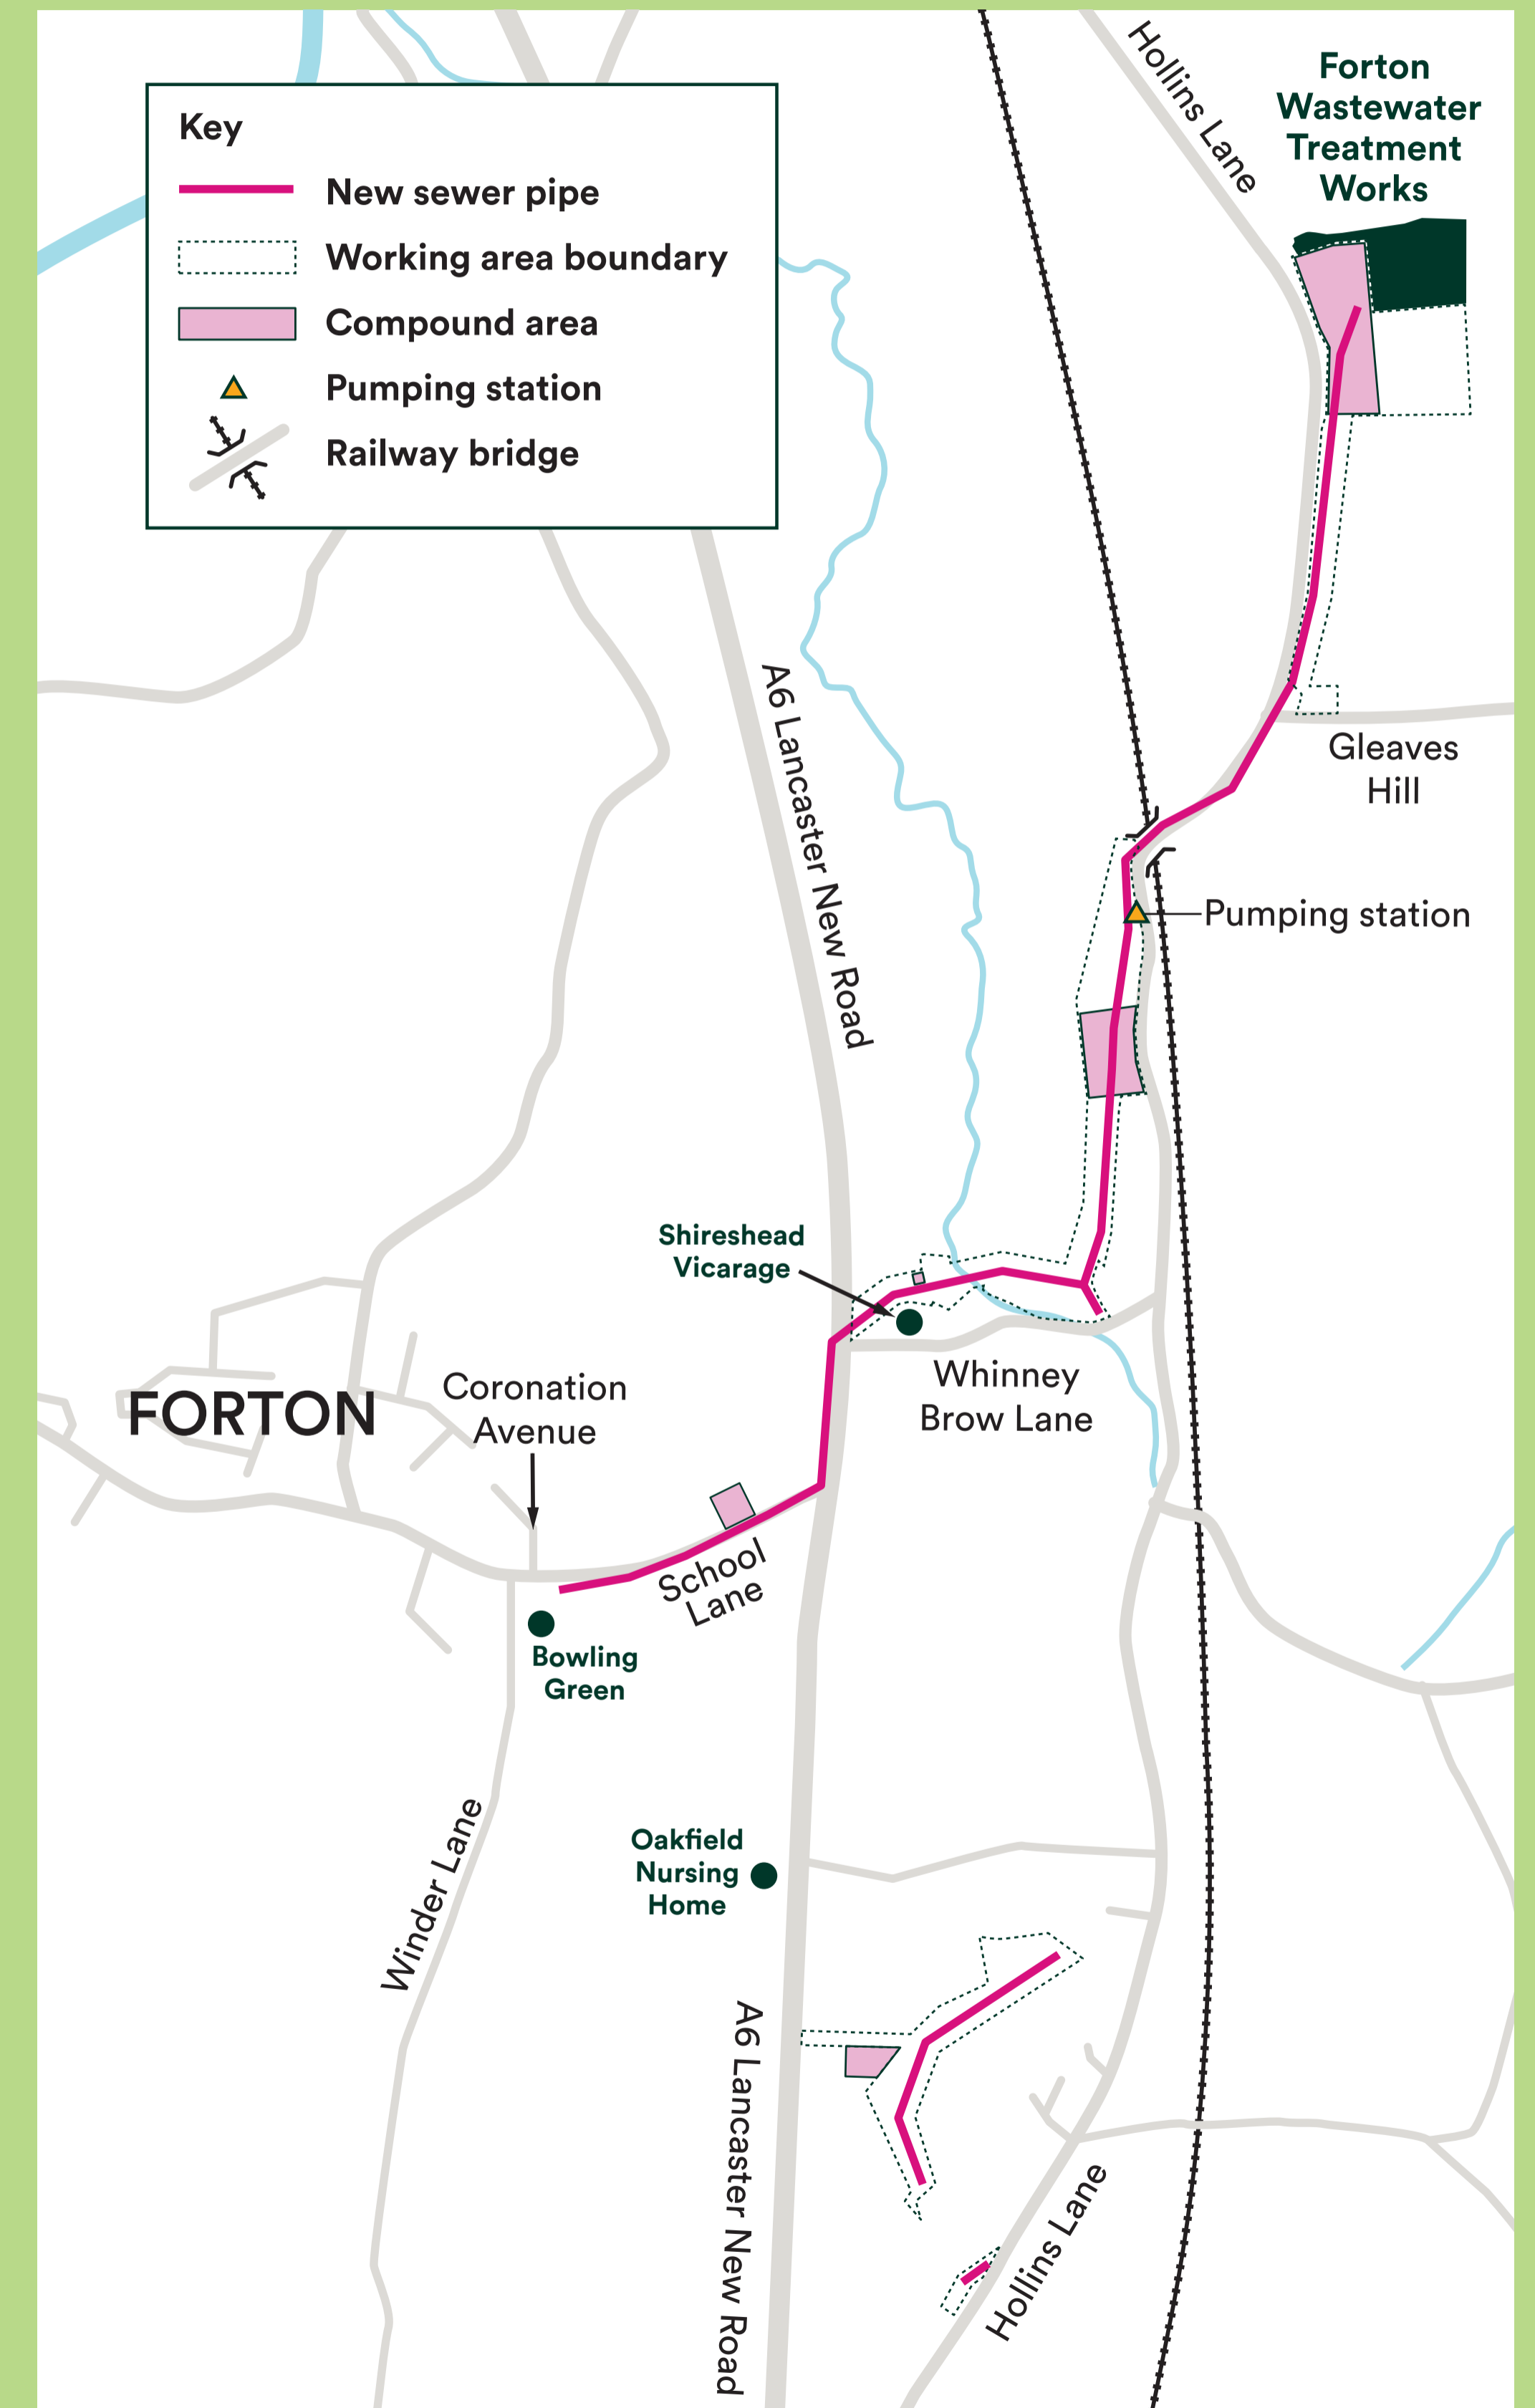

We understand that construction work can be disruptive and this project will involve roadworks while the new sewer pipe is installed.

Signed diversions will be in place during the temporary road closure elements of work which can be seen on the diversion route panel.

- **School Lane closure**  
*Winter 2023 for approximately 2 weeks*  
Temporary road closures in two locations on School Lane.
- **Traffic lights on A6**  
*Winter 2023 for approximately 7 weeks*  
Temporary traffic lights on the A6 between the School Lane/Whinney Brow Lane junction.
- **Hollins Lane closure**  
*Late 2022/Early 2023 approximately 4 weeks*  
Temporary road closure on Hollins Lane while work takes place near the railway bridge.

We expect that all the improvement work will be completed by winter 2024. We'll continue to keep the community updated as our plans progress.

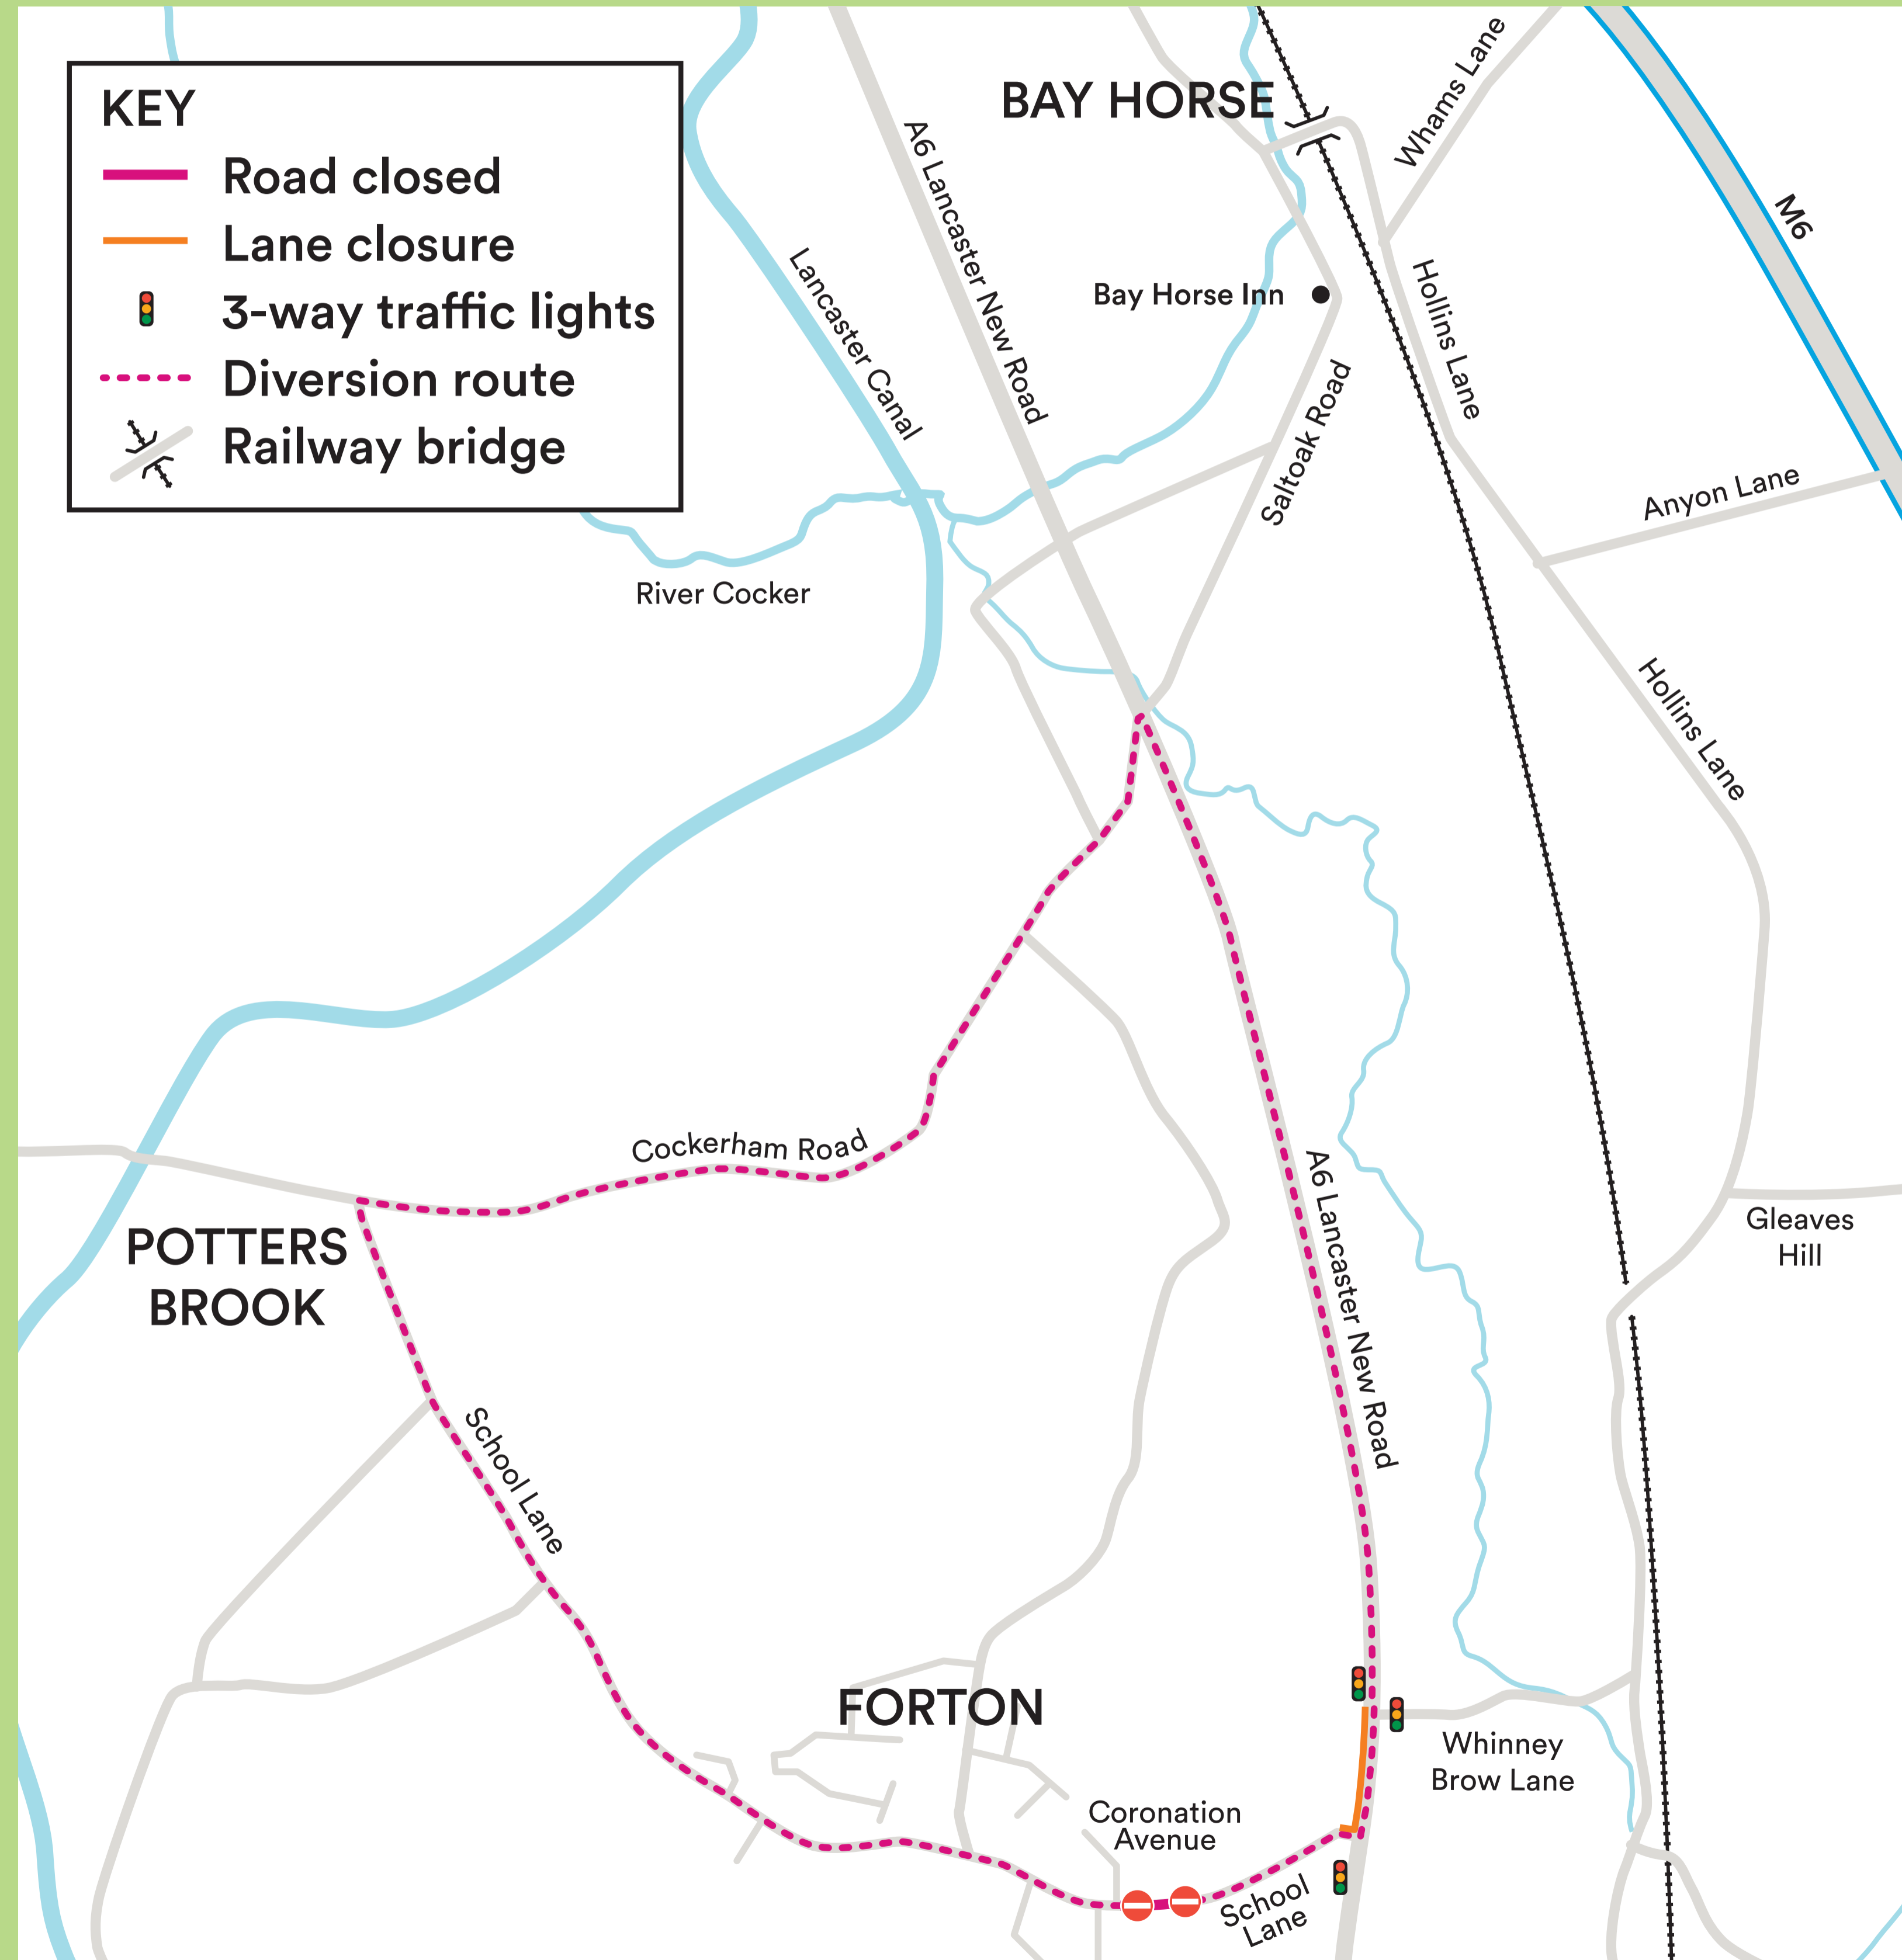

If you have any questions, please speak to a member of the team today or you can always call **0345 672 3723** quoting project number 80061838 and we'll be happy to help.

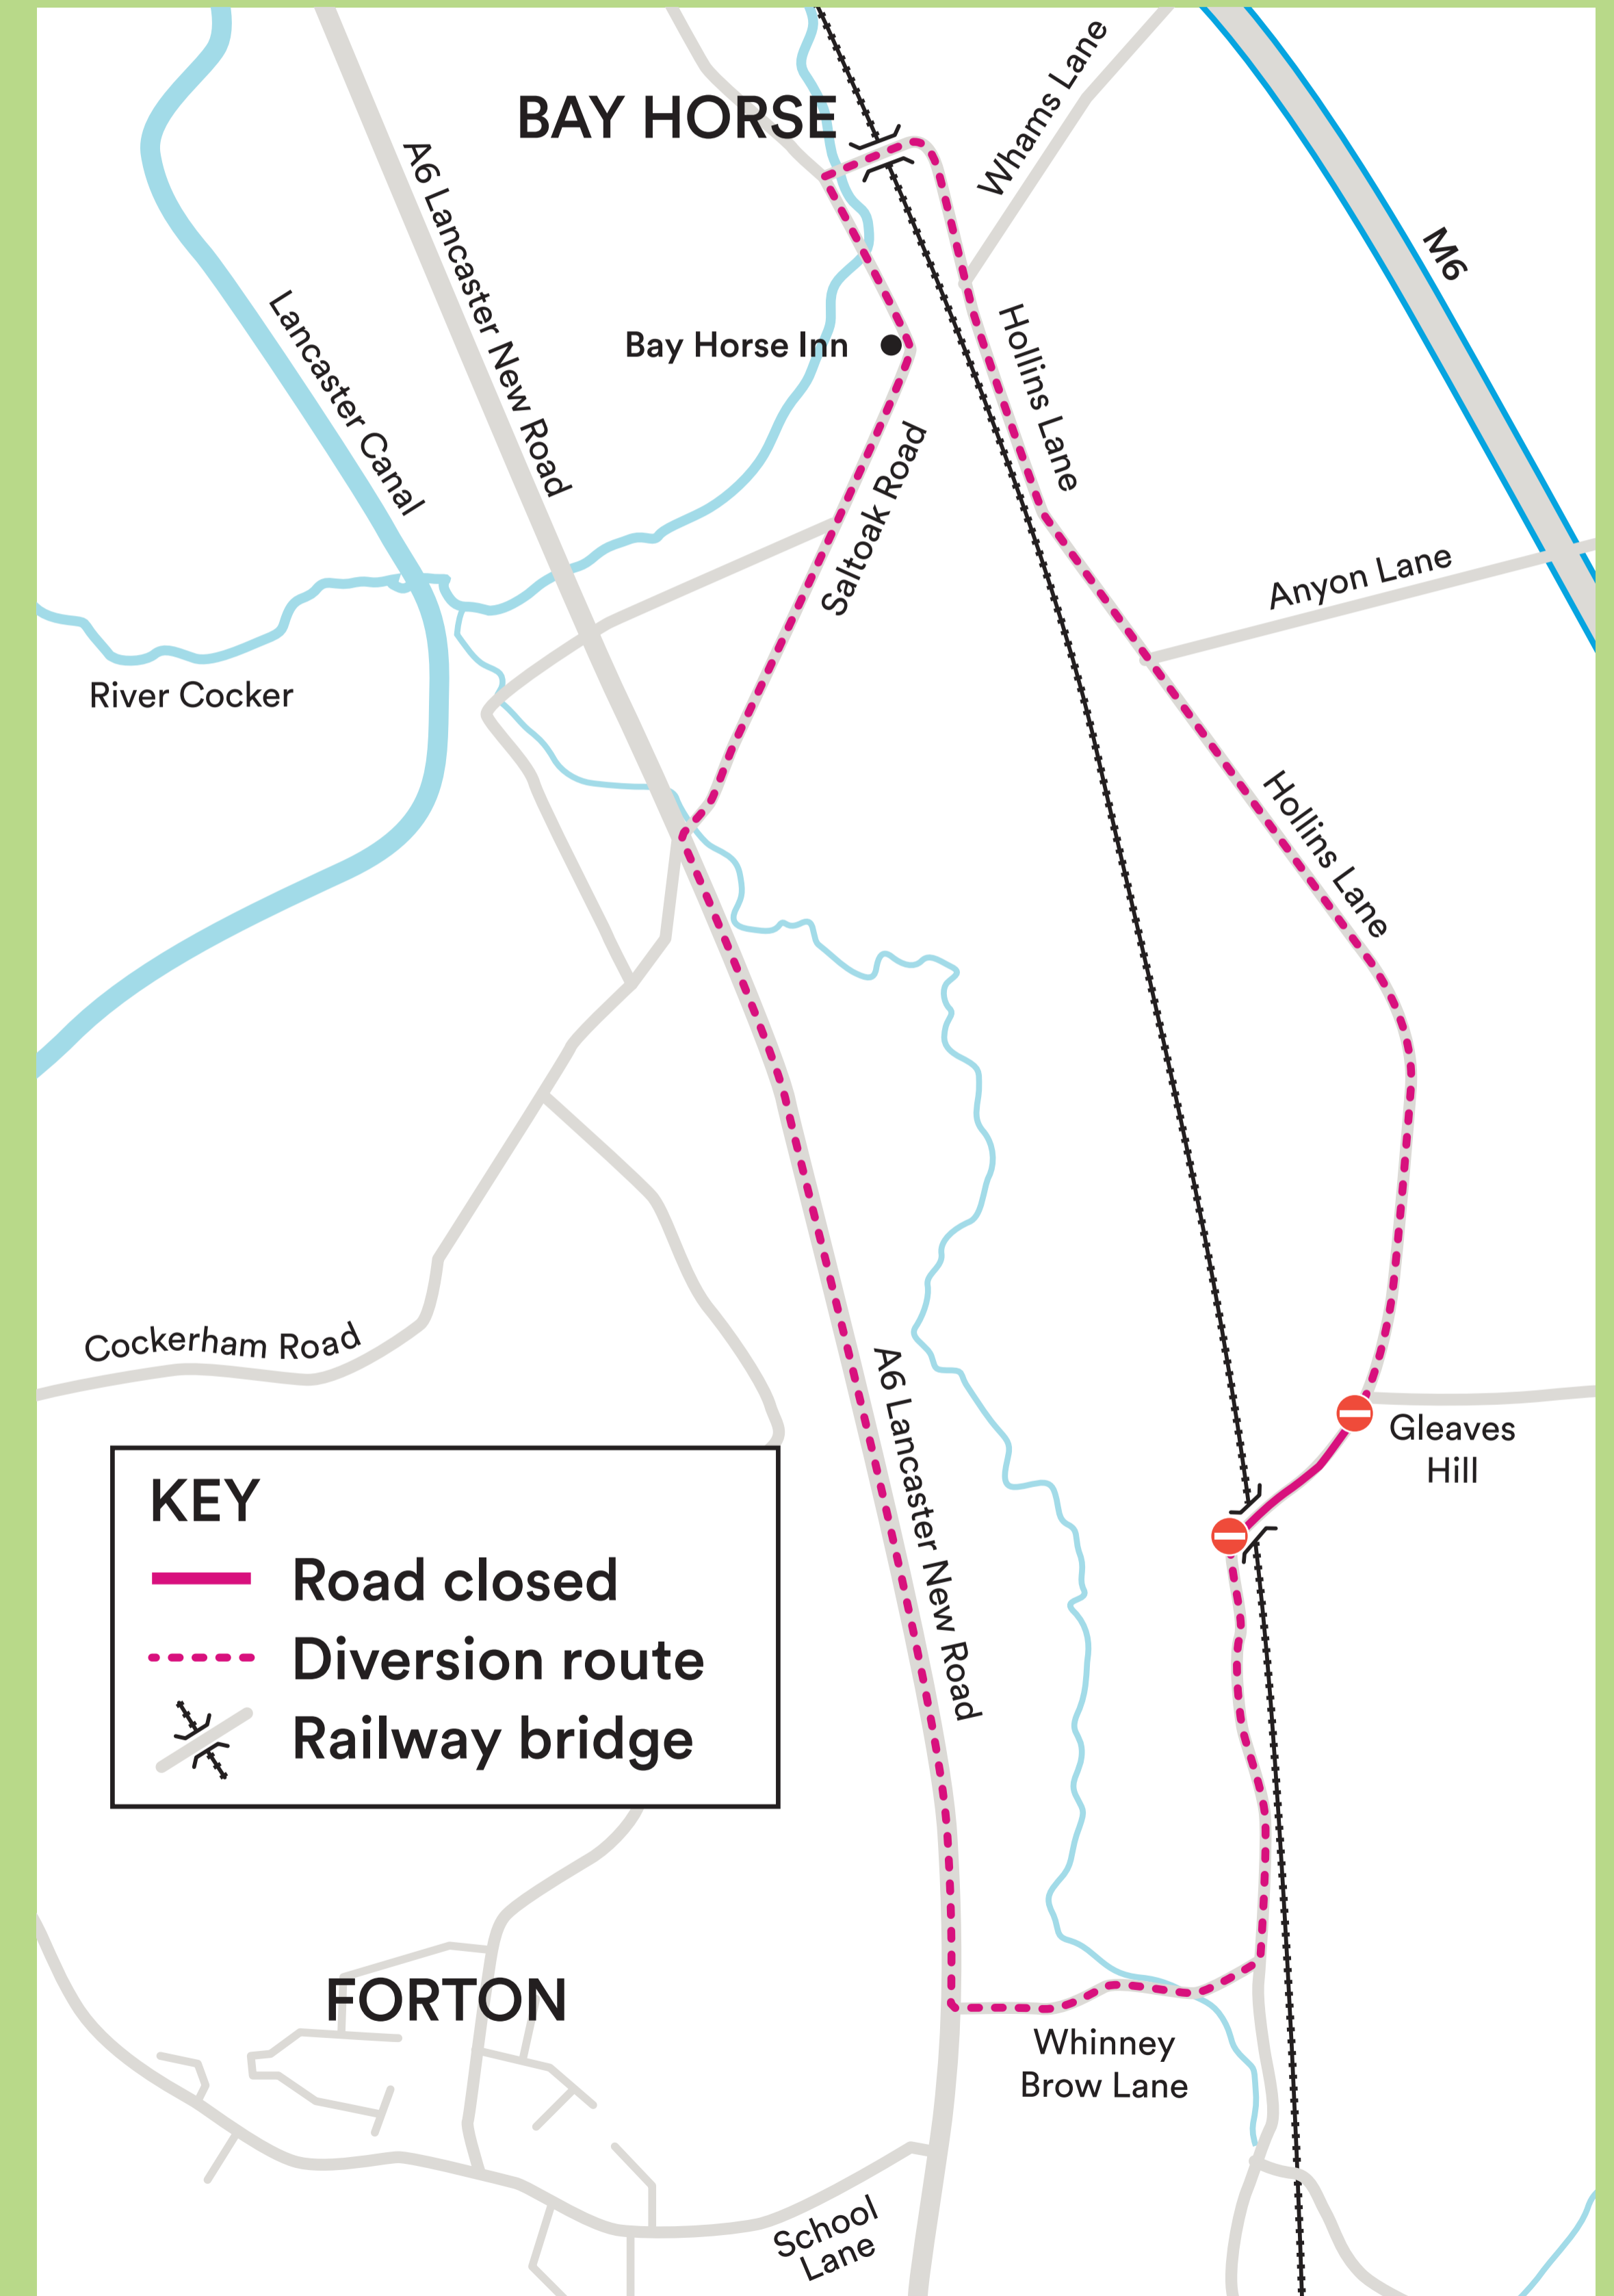

# Diversion routes

## School Lane closure: 2 weeks in early 2023

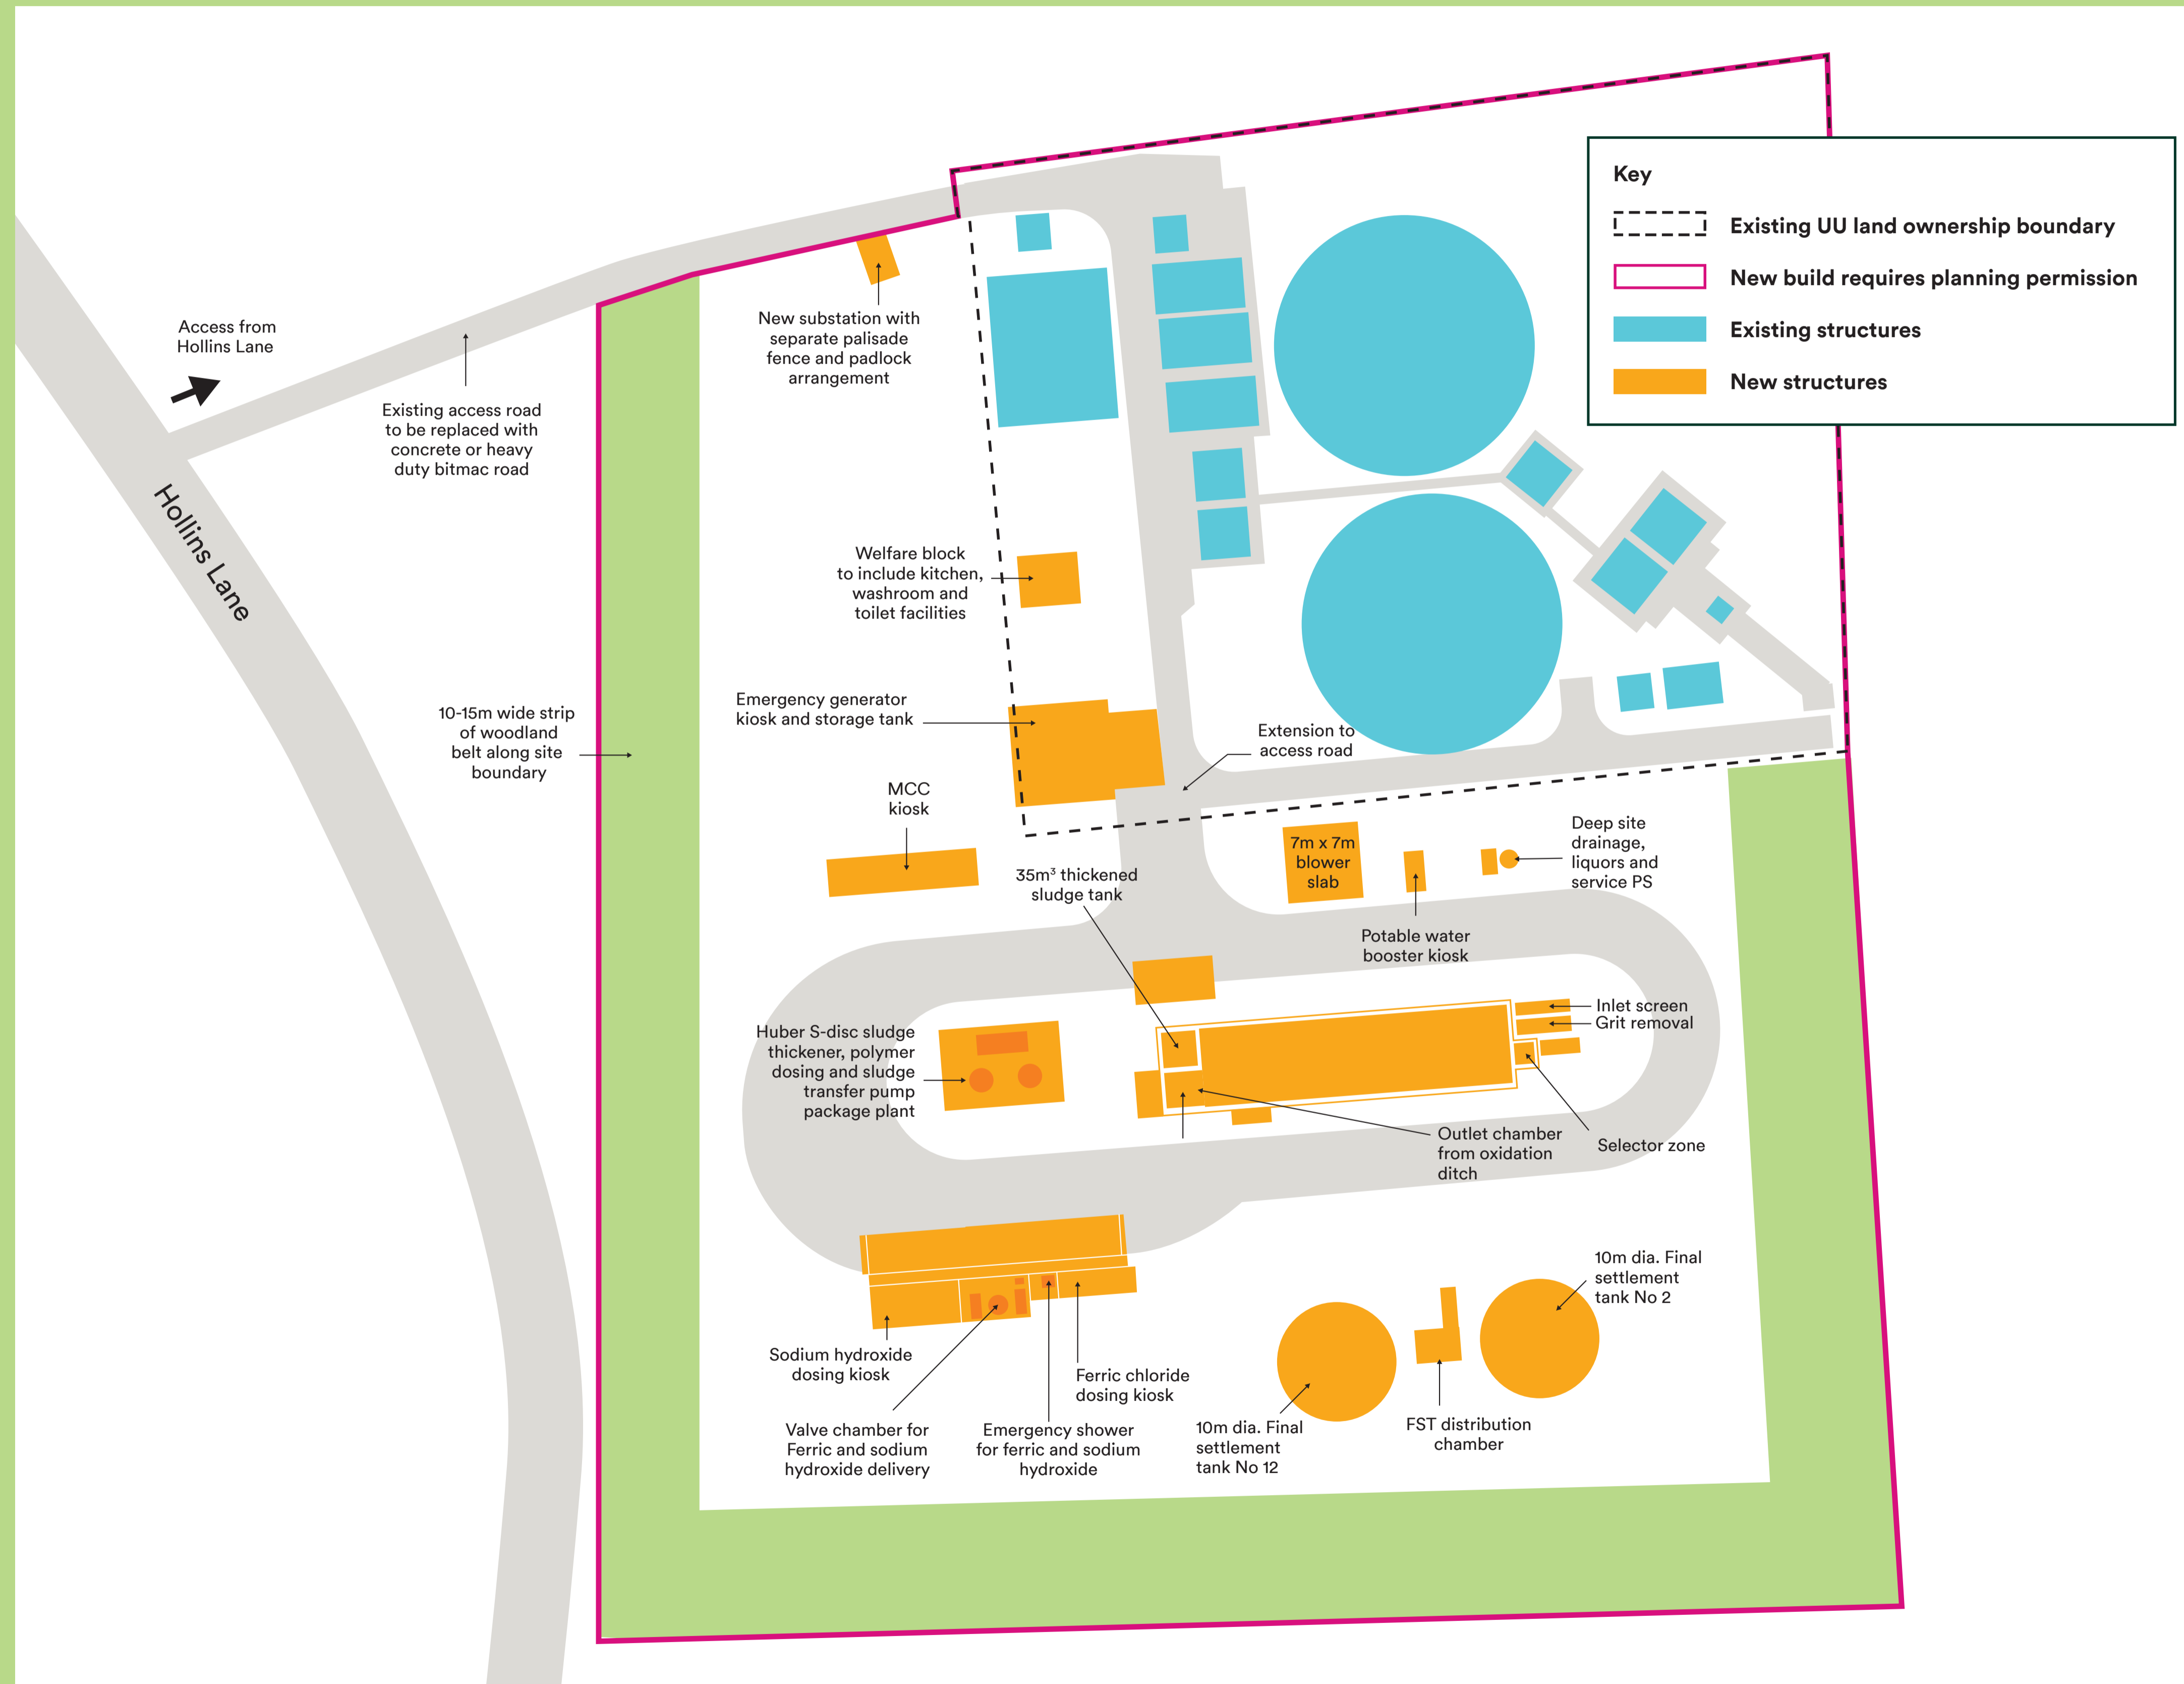

## Hollins Lane closure: 4 weeks late 2022/early 2023
